- Nutritional Support Documentation
- Label Artwork
- Manufacturing Process Flow Diagram
- Shelf Life

These are general requirements. Once we advance in the process a list of requirements will be informed in detail according to the type of product and classification

Key considerations for regulatory compliance

- **Product Classification:** The product is classified according to its health risk level: high, medium, or low.
- **Manufacturing Facility Registration:** The production facility must be registered.
- **Legal Documents:** Documents must be legalized in the country of origin and officially translated in the destination country.
- **Registration Holder:** In Colombia, foreign companies may be the holders of product registrations.
- **Manufacturer:** The manufacturer must comply with applicable sanitary and regulatory requirements.
